Profiles of Attendees

About the Conference:

Development in the mobile technology space is changing rapidly. Various innovations in mobile applications have become a revolution which is creating endless opportunities for developers to build a platform for smart and user friendly applications.

Keeping in mind the various aspects of mobile applications, Silicon India organized a Mobile Technology Summit on October 6, 2012 in Hyderabad which brought together mobile application developers and technologists under one roof.

Key Highlights:

- 4 Keynote Session
- 10+ Technology Sessions
- 180+ Delegates
- Two Interesting Tracks: Android & iOS

Starred Topics:

- Game Development on Android
- Google Cloud Message (GCM) for Android
- Lean App Development - How to Create a Successful App with Minimum Risk
- Android Runtime for BB10/PlayBook
- The Cheat Sheet - Making Mobile Sim Games
- Graphics using Android NDK and OpenGL
- Building Native Apps for BB10/PlayBook for iOS Developers

Innominds

Marketing & Monetizing Your Apps: 10,000 Reasons Why You Should Consider BlackBerry App World

Sujoy Ghosh,
Marketing Mgr - App World & Content,
Research in Motion - Asia Pacific

“It was a great experience participating in the summit. It gave me the opportunity to interact and network both with industry veterans and youngsters in the field. I was pleasantly surprised to see the high turnout, as well as the passion and knowledge in mobile application development which the participants had.”

AV Krishnan, SVP Engineering, [x]cube LABS

Hear from our Sponsors:

“We are excited to be part of the Mobile Technology Summit, and it was very great event for us to engage the developers in India. We look forward to participating in more MTS events. We have many activities coming up for developer in the Asia Pacific region and we look forward to working with more developers as we launch BlackBerry 10™.”

Karuna P A, Alliance Executive, Research In Motion
